

BRIGHAM AND WOMEN'S / MASS GENERAL
HEALTH CARE CENTER
at FOXBOROUGH

BREAST IMAGING

Talk to your doctor about having your screening or diagnostic mammograms at the Brigham and Women's/Mass General Health Care Center

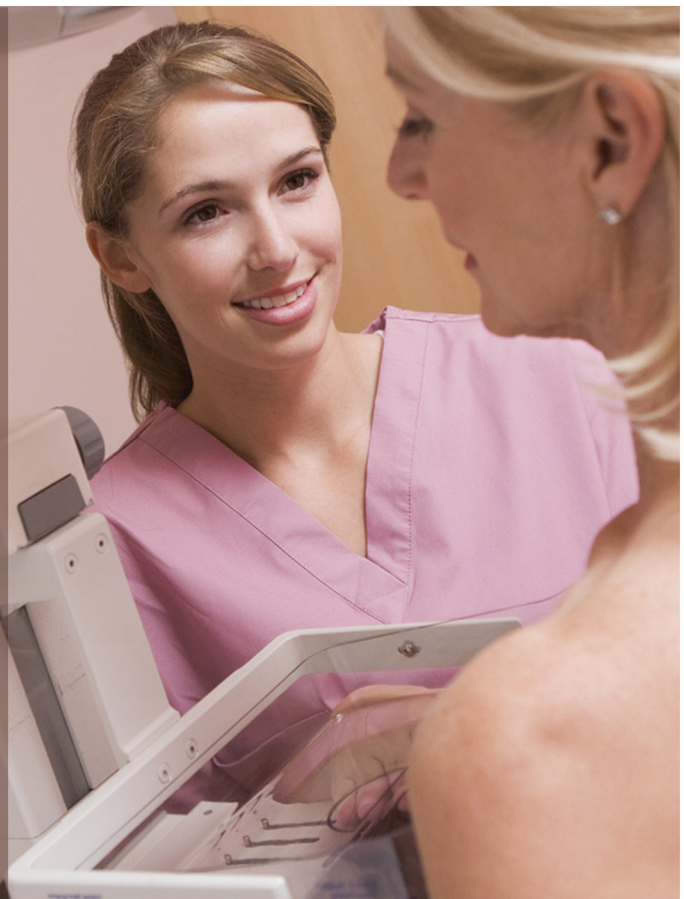

Breast imaging services at the Health Care Center are provided by the same radiologists and expert technologists from Brigham and Women's Hospital. They work closely with referring physicians in the Foxborough area and the other specialists in the building to provide a level of care equal to that found in downtown Boston without the drive into the city.

Key features of breast imaging :

- Access to renowned breast imaging specialists
- Licensed mammographers skilled at quickly obtaining the most clinically useful images
- Self-scheduling and same day appointments for screening mammography
- Modern, convenient facility designed for patient comfort and privacy
- Digital mammography technology to facilitate rapid transfer of images to referring physicians
- Breast ultrasound

Other imaging technologies available:

- MRI
- CT
- Digital ultrasound for general and vascular exams
- Digital X-Ray
- Bone densitometry
